

# Payroll Software Alternatives

We recognise that pricing is a crucial concern for many small businesses, especially during the current cost of living crisis. As a result, you may be exploring alternative payroll software options. Here are a couple of alternatives we've compiled for you:

Payroller is an STP-enabled software that simplifies payroll management by automatically submitting payroll information to the Australian Taxation Office (ATO) through a secure cloud network with each pay run. This comprehensive solution allows you to track, manage, and record payroll while ensuring compliance with the ATO. As a one-stop payroll solution, Payroller enables you to manage staff rosters, invite accountants, bookkeepers, or BAS agents, and make superannuation contributions through Beam. Being cloud-based, Payroller allows you to manage all payroll elements online via mobile or desktop, facilitating remote payroll processing, employee onboarding, and roster management as long as you have an internet connection.

# employmenthero

Employment Hero is an online payroll software that simplifies payroll management for businesses of all sizes, including those with just one employee. It automates payroll calculations, tax filings, and superannuation contributions, ensuring compliance with the latest regulations. The platform integrates seamlessly with major accounting systems and banks, allowing for smooth financial synchronization and payment processing. Employees can access payslips, submit leave requests, and update details through self-service portals, reducing HR administrative burdens. With real-time reporting and analytics, Employment Hero provides valuable insights to enhance overall payroll efficiency.
